

## 1M28 13:17 Glasgow Central to London Euston

Your Class 87 (87012) has been halted on the slow line just outside of Stafford. This is due to the 13:17 from Glasgow coming to a stop in the up fast line at the station meaning you have been tasked with dragging the failed train the rest of its journey to London.

### To Install:-

- Unzip the contents of this Zip somewhere safe such as the desktop.
- Find but DO NOT open your 'Railworks' directory, by default this would be at C:\Program Files (x86)\Steam\steamapps\common\steamapps\common\.
- Merge the 'Railworks' folder that was just unzipped over your main 'Railworks' folder. (Drag into the same directory and not into the Railworks folder).
